The IFS Academy was launched in 2008 in order to optimize the support for all IFS users. It has developed into a strong tool of the unique support system of the International Featured Standards. The IFS Academy offers a variety of training events and seminars for different target groups e.g. for quality managers from the food industry, consultants and all other interested persons.

The aim of the IFS Academy is to provide all IFS Users with valuable and affordable first-hand information about the IFS Standards to facilitate their implementation. In order to offer this service worldwide IFS cooperates with Training Providers. These are companies offering trainings under the name "IFS Academy".
